

Alpivar² capacitors

■ Technical specifications

Discharge resistors

Fitted inside, these discharge the unit in accordance with current standards (discharge time, 3 minutes)

Loss factor

Alpivar² capacitors have a loss factor of less than 0.1×10^{-3}

This value leads to a power consumption of less than 0.3 W per kVAr, including the discharge resistors.

Capacitance

Tolerance on the capacitance value: + 5%

Our manufacturing process, which avoids any inclusion of air in the coils, ensures excellent stability of the capacitance throughout the service life of the Alpivar² capacitor.

Maximum permissible voltage: 1.18 Un
